Postscript drawing format DXF is a native format for AutoCAD, that was introduced in release 13. DXF was also used for two other AutoCAD releases (2003 and 2012). History The AutoCAD R12 compatibility code was written by David Baumgardt, starting in 1999. It was the first product feature to be developed. David Baumgardt, was the first programmer hired by Autodesk to create AutoCAD software. Dave, as he was known to his family and friends, was a master craftsman, graduated from Purdue University with a degree in Mechanical Engineering. He was also an avid amateur CNC machinist. Dave's design work was immediately recognized within the industry, and he was given full-time development to start the new AutoCAD R12 product. Dave's first major achievement was the code that solved the "mouse problem" of the new release. Dave had been using his own "stroke" cursor, which allowed for very precise selection. The R12 product solved this problem by using a mouse cursor, with a tiny red rectangle, to select. It was an obvious improvement, and was copied by other vendors, such as CAMWorks, VEDIA, and others. Versions AutoCAD, a software package used for architectural design. AutoCAD LT, a version for schools and small businesses. AutoCAD R12, first released in 2000. AutoCAD 2012, version R12x64, first released on January 31, 2012. AutoCAD Architecture, a product by Automated Home Solutions (AHS) that is based on AutoCAD 2012. AHS has won the 2008 "Best of Boston" Award in the Architectural, Engineering and Construction industry, AutoCAD. AHS has also been rated "Top 50 Local Companies to Work for" by Boston Magazine and "100 Best Companies to Work for in Massachusetts". AutoCAD Electrical, a product by Automated Home Solutions (AHS) that is based on AutoCAD 2012. AutoCAD Plant Design, a product by Automated Home Solutions (AHS) that is based on AutoCAD 2012. AutoCAD Civil 3D, a product by Automated Home Solutions (AHS) that is based on AutoCAD 2012. AutoCAD Mechanical, a product by Automated Home Solutions (AHS) that is based on AutoCAD 2012. Add and track comments in the most efficient way. Your comments will be automatically associated with the drawing and will be preserved in future drawings without manual efforts. (video: 1:09 min.) Use the graphical Feedback Assistant to provide feedback. Use the Feedback Assistant to submit feedback or create a new drawing. (video: 1:26 min.) Use a Feedback Device to send comments from mobile apps. Use a Feedback Device to add comments directly from apps. (video: 2:23 min.) Collaborate on the same drawing as your team using Markup Assist. The new options in the Markup Assist panel will display the user's comments so that you can communicate more efficiently with team members. (video: 1:45 min.) Automatic Layer Creation and Layers: Automatically create the layer for each object that is drawn. You can now click the add icon to insert a new layer and create a new layer automatically, even for vector objects. (video: 1:27 min.) The new setting in the Layers panel, enable/disable Auto Layers, let you create layers for objects that you draw. (video: 1:18 min.) Edit multiple layers simultaneously. Now you can add or delete multiple layers at the same time. Select Edit Layers to open the layer settings, or use the Layer menu to open the menu and choose Edit Layers. (video: 1:25 min.) Enable multi-layer editing for drawings, and edit multiple layers simultaneously with a single click. Edit multiple layers in the same drawing, with a single click, for streamlined editing. (video: 1:27 min.) Create a sequence of layers to represent a single component of an object, so you can select layers from multiple levels. With the new Layout panel, you can set a sequence of layers, with a click, so that you can create multiple levels and create a hierarchy of your drawings, by creating a sequence of layers. The new sequence of layers is now available in the AutoCAD desktop. You can also use the dialog box, which allows you to easily create a sequence of layers. (video: 1:19 min.) New option in the Layout panel, multiple layers. Select multiple layers and create a sequence of layers by dragging the up and down arrows. (video: 1:26 min.) Enhanced Dimensioning and the Shape L
