According to the poll, which was conducted by Mason-Dixon Polling & Strategy for GBAO-TV, Whitmer got 47 percent to Schauer's 40 percent in a hypothetical matchup. If the election were held today, Schauer would win 43 percent to 46 percent for Whitmer, according to the poll. The poll also shows a tie for the lead in the state's marquee governor's race. Patrick Colbeck and Sandy Baruah, the co-founders of the auto-parts manufacturing firm Colbeck LLC, both got 43 percent. Republican Bill Schuette, the current lieutenant governor, had a strong lead, at 53 percent to Whitmer's 32 percent. The race in the Democratic primary for governor was more competitive, but former State House Minority Leader Shri Thanedar still maintained a slight edge over former state Sen. Gretchen Whitmer, who is seeking the Democratic nomination. Thirty-nine percent of likely Democratic primary voters say they'd vote for Thanedar if the election were held today, and 38 percent said they'd vote for Whitmer. That would translate into an election outcome of 42 percent for Thanedar, 41 percent for Whitmer, and 17 percent undecided. Colbeck says the poll confirms what he's been hearing from potential donors. "In fact, I think we're going to break a record with some of the people who are already committed to giving and we're not even on the ballot yet, "he said. "We're looking at a big commitment already." The polling firm reached the sample for the survey through voter lists compiled by the League of Women Voters. A series of polls in recent

PackMage For Windows

PackMage is a virtual 3D modeling tool that makes the packaging production process faster and more efficient. It is an easy-touse and intuitive design tool with a template library and advanced functionality. PackMage is used to create and optimize carton box designs. Main Features: Flexible design PackMage is a powerful application that comes with a built-in library of readymade templates. It is designed to give you the freedom to try out your packaging designs from scratch. Besides the 2D model preview, you can also preview the design in 3D, allowing you to take virtual measurements and preview the model at a preview speed of your choice. Material library PackMage enables you to import various material textures, while the library is ready to assist you with the import of custom entries, making it easy for you to expand the application with your own materials. Parametric template If you plan to make several modifications to your design, PackMage helps you set parameters and design it from scratch, with a range of adjustment options. This provides you the freedom to configure the design to your specific needs. 3D preview PackMage provides you with an easy-to-use 3D preview tool. It enables you to verify the model's accuracy and view it at a preview speed that you define. 3D simulation After you finish designing the box, PackMage offers a 3D simulation feature that allows you to see the entire folding process of the box. You can set a preview speed to see how the model is going to fold. Material library With PackMage, you can add custom entries to the library. You can also import textures and logos, customize them and place them on the sides of the box, creating a beautiful package. Screenshot You can use PackMage's Screenshot function to take a screenshot of the model and save it locally. Animation You can use animation to automatically generate a GIF and move through the model to preview how it will fold. You can even export the animation to video and add it to a PowerPoint presentation or export it as an AVI file. Simulation speed You can modify the simulation speed of the model to ensure that you will not experience any unpleasant issues during the design process. COMPANY PROFILE Industry: 3D printing COLLABORATION With IMME, we are looking for experienced software developers who can focus on delivering high-
