The AutoCAD software runs on a wide range of computer platforms including Windows, Macintosh, Linux, and Unix operating systems. Version 11 introduced an option to run AutoCAD on the iOS operating system, although it does not support all features of the application. AutoCAD has a large number of add-on products available in most categories, from specialty software for landscape and architectural visualization, to very specialized tools. These range from the fully integrated Primavera project management software to C4D CAD/CAM software, Geomagic Studio, AutoCAD, STEP files and Filo. New features In addition to its suite of standard products, AutoCAD has offered add-ons, also known as extensions, for many years. Add-on products are generally supported by a subscription service. They are frequently supported for the full length of the subscription, or through a limited free trial period. Over the years, various extension companies have developed a large collection of extensions for AutoCAD. A feature of AutoCAD known as "live" is intended to avoid the need for many of the customizations and maintenance tasks associated with software. Acquisition by Autodesk In early 2007, Autodesk acquired a majority share of Infinite Knowledge, Inc., including the intellectual property assets of the AutoCAD product line. In October 2012, Autodesk unveiled AutoCAD LT, a new 2D graphics and design application based on the AutoCAD Architecture product. It was released in the US on October 24, 2012 and in the UK on October 26, 2012. AutoCAD LT has a 2D design perspective, but it also supports 3D models and is comparable to the other products in the AutoCAD Architecture product line. On April 12, 2014, Autodesk launched the U.S. Developer Network. It offers access to software, support, training, and marketing resources for software development in the Autodesk ecosystem, including Autodesk software, as well as 3D and other design software such as Maya, and provides an opportunity for developers to earn revenue by providing products and services to Autodesk customers. On April 17, 2016, Autodesk released a new cloud-based service, AutoCAD 360 Cloud, a subscription-based 3D CAD service for designers. On November 2, 2016, Autodesk acquired an additional stake of 23.98% in the company. ca3bfb1094
