The final release of the long-awaited Elden Ring Game! The Elden Ring is the story of the first king of the Elden Realm. Come play as the hero who obtained the powerful Elden Ring and battled the Elden King. Experience the high drama of the clash between the light of the Elden Realm and the darkness of the E-Rivellon. The power to be an Elden Lord of your own realm awaits you! GAME FEATURES: - A Massive World The Lands Between, the first world of the Elden Realm, is a world connected by a network of thick darkness. Open fields and deep dungeons are continuously connected, leading to vast and complicated online battles. - Localized Data Exchange Different from the Pokémon or Marvel vs. Capcom Battle of the Legends series, which are compilations of "franchise games" from multiple developers, the Lands Between was developed by TARKA, a single developer. We will continue to support the battle of the franchise games from multiple developers, but the Lands Between will be the first title to use localized data exchange in this way, continuing the game's path of a stand-alone game with a single developer. - Noble Classes Eight classic classes are present in the game, each with new skills that were specifically developed to be suitable to the unique setting of the Lands Between. - Attain a Sense of Satisfaction through Possession and Reincarnation With an intuitive class job system, you can freely customize the class that you possess to fit your play style. Through Class Reincarnation, you can freely reincarnate your class, and you can equip or lose your weapons as you please. - A Multitude of Localized Data The game is fully loaded with localized data, including plot, data, and localization, to offer a system of full immersion into the Lands Between. *Localized data means data that is originally in Japanese, and in which quality and expression has been enhanced via Korean localization. About TARKA (via Steam Greenlight Page) From the bottom of my heart I would like to express our gratitude to the players who have supported us so

warmly. We are TARKA, a Korean development company, founded with the dreams of the gaming and LBP communities. We are thrilled to be able to partner with such good friends from the worldwide LBP community for the release of the Elden Ring game.

The traffic lights are not working, and in fact people on the bridge are just walking across the road.
