Try to make the island of San Lorenzo a better place by developing it, build new churches, hospitals and schools, and win elections. One election at a time! City Simulations games have always been about improving the city through policies and alliances. Your decisions are carried over in the next game and can make a huge difference. That's why Tropico is the go-to game for anyone wanting to play as a mayor! As a mayor you must improve your city and advance the economy by building new factories, roads, hospitals, schools and houses, all the while maintaining good relationships with other islands. But just like in real life, problems come when you run out of money, when people revolt against the government, when hurricanes strike, or when there are natural disasters. After all, what good is a city without a drinkable water supply or a strong government? Key features: * Create a government and lead your people * Build new things and manage the budget * Scour the world in search for resources * Run elections to win more followers * Meet and chat with citizens in town squares * Watch out for natural disasters such as hurricanes and volcanoes * Go through six different time periods in a single game * New Features - Dynamic Campaigns - Bigger game map - New Characters - Re-designed GUI and Front-end - Improved AI - Improved AI Jobs - Brought back Scarcity - Weather events - New Unique Resources - New Town Hall Buildings - Improved Graphics and Visuals - New Special Buildings - New Buildings and Jobs - New Territory Views - New Island Art-container-left.nav-tabs { margin-bottom: 10px; } .nav-tabs > li > a { padding: 5px 20px; } .nav-pills { float: right; margin-right: 20px; } .nav-pills > li > a { padding-top: 15px; padding-bottom: 15px; } .nav-stacked { overflow: hidden; border-width: 1px 0 0 0; border-style: solid; } .nav-stacked > li {

Friendsim 2 Download [32|64bit] [2022-Latest]

The game is inspired by the Super Mario Bros. The game is played on a grid layout. During each level, hazards or enemies appear randomly. The player can jump either left or right, as well as up or down. Players can also run and dash, as well as grab power-ups, which will increase the player's hit points. If players fall off the grid, they may also restart from the last row they were on. This includes the player who fell off. If a player falls off the last row, the game will not restart. If a player dies, he will be transported back to the beginning of the level. There is no way to skip levels. The layout of the level has no meaning. The game does not have a plot. There are only two modes, Singleplayer and Multiplayer. If the game crashes, the computer/player(s) was/were out of memory. The game will therefore be quite laggy and be impossible to complete. There is no way to do a screenshot. Instead, add a comment to this topic, or on Steam, if you want to add a screenshot. No one has yet contacted me regarding any duplicate content. I hope you enjoy the game and I really hope you also leave a review. What's next? I am currently working on a tutorial for the game, and I expect that this will be ready by the start of October. More levels are planned to be added after this. That being said, I am open to ideas. I am currently focused on: - Level Design - Game design - Localization - Multiplayer - Server administration - Title screen - Networking If you have any other ideas, please let me know. Development History Version history: 0.1.0 The Game Completed 0.0.0 Initial Version This is a new project I've been working on for the last two months. You can view my work on Twitter as @s_davisc Steam page: What's next? 0.1.0 The Game Completed - A new level was implemented: The Necromancers' Tower. - Adding a tutorial. - Making a bit less laggy. - Adding some minor bugfixes. I am currently working on a tutorial d41b202975
