This version now allow b7e8fdf5c8

Metadata Document Generator - Microsoft Dynamics CRM 2011 Crack

Metadata Document Generator is an application that is especially designed to assist Microsoft Dynamics CRM 2011 integrators when it comes to creating entity documentation. The program is also suited for connecting any type of deployment of Dynamics CRM. Metadata Document Generator enables you to manually pick the attributes that will become part of the documentation as well as the entities that will be part of the generated workbook or document. Metadata Document Generator - Microsoft Dynamics CRM 2011 Key Features: ■••■ End User Based Working Environment: End User Based Working Environment Metadata Document Generator is a great tool to utilize in order to create entity documentation because of its unique working environment. This tool enables the integration consultant to create a working environment inside the client's system. This feature allows the integration consultant to have a feeling of working inside a client's system. ■••■ End User Interface: End User Interface The end user interface enables the end user to have a direct control on the working environment. It also enables the end user to interact with the text documents. This means that the end user will have the ability to make an interaction with the text document. This tool also has a zoom feature that allows the end user to make the document's content more readable. It also allows the end user to zoom in or zoom out as well as zoom in and out simultaneously. ■••■ Customizable Working Environment: Customizable Working Environment With the customized working environment option, the end user can add their own fields to the entities or to the fields that are already included in the generated documentation. This feature allows the end user to add additional value to the entity and to the documentation. The consultants can also add information to the field description. ■••■ Property Detail Option: Property Detail Option This option will show the attributes of the entities. This feature allows the end user to get more information about the entity than the default columns in the Microsoft Dynamics CRM 2011 Metadata Document. Furthermore, the consultants can set the desired properties to the existing and new properties. The consultants can also add new properties to the entities or to the generated metadata document. ■••■ Document Link: Document Link The Document Link option allows the user to keep all the documents related to an entity and it will allow the user to reach to any of the documents easily. This is an option that will enable the user to look for the document at any time. ■••■ Database Explorer Option: Database Explorer Option The Database Explorer option provides the
