Bob Ross How To Get Bob Ross' Creative Style If you have "limbo dreams" where you're not sure whether something is going to happen, you're usually wrong. If you had one of those dreams a week before Thanksgiving and were terrified of the phone ringing (which it did), you're being an old woman. If you had the same dream even months later—and were so frightened that you would never see your mother again—then you're being a real sellout. If, deep down, you're convinced that you might never get your big shot, all that depression, apprehension and self-hatred will slowly kill your creative drive. But if you are still hopeful that some good will come out of the dream—and if it is indeed good for you—then all those close call sensations are important, at least for survival as a copier of Bob Ross. If you've ever been carried away on a joyride through the alpine country of the Moraine National Forest, a few mountains west of Kalispell, you know what I mean. But those of us with a

proclivity for order must hunt higher and seek the Gizmo Room, which teaches us how to use a first-class picture tube for art. Of course, trying to replicate the effects of the kind of tools Bob's artists used is more like trying to go back to college and become a lawyer. You could, but if you're seriously attracted to Bob Ross' communication style (I know I am), then save your money and learn a new language—or play with different colors in good old-fashioned paint. The backbone of your Bob Ross style is a clear-as-water soft palette—four colors and a spare white. That way you can surround every something with a fifth. It's a set-it-and-forget-it technique. But Ross is a hard act to follow. As Disney studio head Bill Walsh bluntly phrased it when I asked him about the next imitator, "He doesn't just copy Bob's style. He copies Bob's name. Forget my own name." It's easier to parody than it is to copy, for obvious reasons. In art, the
