
Rotate Md 80 Crack 43 High Quality

Flexbeam of yoke Coupled with the importance of a well-maintained and properly balanced rotary wing aircraft, ensuring proper and accurate maintenance and service of a helicopter, or rotary wing aircraft, includes routine, proper inspection and maintenance of the following components:

- ☐ Rotor blades: Proper maintenance of the rotor blades includes routine inspection, removal of the main rotor blade, and replacement of the spindle and bearings.
- ☐ Rotor head: Proper inspection and maintenance of the rotor head (rotor system) includes inspection of the swash plate, the connecting rods, and the sleeve bearings (when installed).
- ☐ Rotor hub: Proper inspection and maintenance of the rotor hub includes inspection of the hub drive gears, the drive gear nuts, and the bearings.
- ☐ Rotor pylon: Proper inspection and maintenance of the rotor pylon includes inspection of the anti-torque devices, the cowl, the swash plate bearing, and the pylon struts.
- ☐ Control linkages: Proper inspection and maintenance of the control linkages includes inspection of the hydraulic fittings, the piping, the piston rod nuts, and the stem of the swash plate.
- ☐ Control cables: Proper inspection and maintenance of the control cables includes inspection of the cables, the cable clamps, and the ball joints.
- ☐ Wheel suspension: Proper inspection and maintenance of the wheel suspension includes inspection of the suspension lines, the joint nuts, the bellcranks, the bushings, and the ball joints.
- ☐ Power-driven flight controls: Proper inspection and maintenance of the power-driven flight controls includes inspection of the control cables, the upper and lower swash plates, the cables, the gear boxes, and the hydraulic fittings.
- ☐ Control units: Proper inspection and maintenance of the control units includes inspection of the linkage, the piping, the hydraulic fittings, and the antifriction bearings.
- ☐ FUEL INJECTION: Proper maintenance of the fuel injection includes inspection of the fuel injectors and piping.
- ☐ ELECTRONIC INSTRUMENTATION: Proper inspection and maintenance of the electronic instruments includes inspection of the instruments.
- ☐ Chassis: Proper inspection and maintenance of the chassis includes inspection of the wiring harness and the engine mountings.
- ☐ Engines: Proper maintenance of the engine includes inspection of the engine oil, the oil filter, the cylinders, the piston rings, and the piston bearings.
