“Penko Park is a minimalist slice-of-life puzzle game, stuffed to the brim with puzzles, monsters, and interesting, unique dungeons.” Tim Rogers, Digital Director, Pocketwatch Games About the Debut Gameplay Demo: “You're in a magical kingdom and you've got a castle. You also now have an on-screen camera. And you've got to save the prince.” Jeroen Teer, Lead Gameplay Engineer, Penfold Studios Let your monsters loose in 3D puzzles and save the world! Penko Park is a 3D puzzle game about taking point and clicking all-new 3D monsters from your screen to the real world. It's about finding your way to the next potion, spear, or potion pot to save the prince's life, the princess's life, and the world from a series of unfortunate events. You play as a fairy and a dragon whose intent is to find the way to the potion pot and save the prince. The world is magical but a bit weird. You'll meet the ghosts of past pandas and you'll see the essence of a tiger petrified in a pile of shards by a fire. Besides the magic, monsters, and potions, you'll also find a magic pencil that cuts through the world, and you'll have to use it to explore the world in 3D. Each secret in this world is a puzzle of sorts. There's a spider with a tool that can build bridges, and there's a nest of green penguins that can give you a boost of energy with their sweet nectar. Each secret has a maze-like visual style that takes you through a twisting, turning quest. There's a lot of weird creatures, a lot of potions, and some cute ones too. You'll find a teleporting porcupine, a pair of flaming seahorses, a seal that can be perched on your arm, and a cat that walks the line between a cat and a dog. But for real good news, you can play the demo in VR using your Google Cardboard or Oculus Rift. (or any other non-VR headset) This is my first game on GameMaker Studio, and I was so glad to find it's powerful yet easy to use. You can ask me anything you want about the game, or not. I'm happy to answer your questions. About Penko Park: “Penko Park is a minimalist slice-

O discurso, da pessoa designada para ser o tesoureiro, foi gravado em uma câmara holandesa e publicada pelo jornal Financial Times. E ele permanece o discurso do principal candidato republicano à presidência da Casa Branca, revelando privilégios e expectativas em quadros de investidores, onde Trump promete a flexibilização de regulações para que empresas podem continuar deslocadas para as terras sob administração dos Estados Unidos. “Bill, financeiro-empresário apoiado por Google. Orphan Dreams Review by Daniel Jöstl [This review first appeared in PCGamesN on 31st of July 2014.] Ever wanted to play through a text-only game? Well, look no further than The Orphan Dreams, from developer John Eubank. The Orphan Dreams is a text-based adventure game wherein you guide the orphaned Daisy through her life and the events that took place within it. It's a game that takes place over the course of a single night, and you guide Daisy through her memories and thoughts as she recalls them. In this game, you play the point of view character, Daisy, and experience all her memories as she recalls them. I want to note right off the bat that the game has a very text-based style to it. There's no dialogue to speak of in this game and every moment of it is played through text. It means that there's no speech bubbles or any form of typing text that you would expect from a visual novel or action game. What you see is what you get, and that's exactly what this game is. In this game you can only control Daisy. You
