Rilinaweli Rilinaweli (died after 1202) was the Mongol prince who rebelled against his father, Hulegu Khan, during the first year of his reign in 1207. He was subsequently defeated and executed by Hulegu's brother, Baba-Arik, in the Battle of Ongi, in which Hulegu's wife, Sapayagin, was also killed. Background Rilinaweli was the youngest son of the Mongol prince Ariq Böke. The prince reportedly had a great talent for horsemanship, and Baba-Arik was impressed by him and considered him a potential heir to the throne of the Mongols. Rebellion Rilinaweli became rebellious when Hulegu died. He then started a revolt against his father, and moved to the Kerait fortress north of the capital, Karakorum, and got support from Yelü Dashi. On the first day of the uprising, Hulegu's generals, who were in charge of the guards, imprisoned the prince, but on the second day, he escaped and sought refuge at the court of King Chaghatai. There he was first imprisoned for a few months before being released. Meanwhile, Ariq Böke, who had been planning to take his own revenge, broke out of prison, defeated his brother and killed him, seized the capital Karakorum and executed or sent to exile some of his enemies. Battle of Ongi While Rilinaweli was in Banaq, Ariq Böke sent a detachment to attack him. The prince fled to the territory of Ongi Kherlen, north of Karakorum. The prince asked the judge of Ongi, Naiq Noyan, to lend him his daughter Chahir to marry. Naiq agreed and sent the princess to the prince. Soon the prince and the princess were betrothed, and then the prince moved to Ongi. On July 19, 1207 Ariq Böke led an army to Ongi to confront the prince. The Mongol army swept over the Kerait fortress (which had been the seat of Rilinaweli's rebellious activities), capturing and killing many of the defenders. The prince fled with the princess from the fortress to nearby Arsuu, and the Mongol army pursued and caught up with them in the area of Ongi. There they fought the battle, but they were
