The Elden Ring was once thought to be an insignificant myth. Everyone had long since forgotten its existence, or perhaps had never even known of it. Now, you are summoned to the Lands Between, a large, mysterious place, where the god of the Elden Ring and the Red Sword (Yorch) promises to aid you in your quest to become an Elder Lord, one of the Elden Ring's strongest servants. Since then, you've gone on your journey, fought monsters and enemies, and acquired a reputation as one of the strongest warriors in the Lands Between. Thus, your skills have improved, your combat has been honed to perfection, and you are ready to meet the next challenge. The Elden Ring awaits your arrival at the Elden Gate. \- ENJOYMENT OVER SPEED That slow, leisurely, out-of-focus gameplay is boring. We have updated that to make it more accessible to players who want to enjoy their games more, while the "stress-free" gameplay of "unknown, complex and high-stress game play" can be enjoyed by those who are looking for a challenge. When developing DRAGON QUEST, our goal was to make sure that the player can enjoy gaming without being stressed out. Rather, our goal was to implement new gameplay to provide the best gaming experience to the players while maintaining an enjoyable gaming environment. In that sense, we understand that everyone has different tastes. "Tastes are subjective" - for this reason, we have implemented a full system that lets the players enjoy gaming in a more "stress-free" and "slower" manner while at the same time keeping the "stress-free" part, making more of "long-term gaming enjoyment". The "stress-free" mode of gameplay is especially important when playing for long periods of time. And because DRAGON QUEST is not a game that primarily requires continuous and constant participation, it is more suited to the "slow-paced" gameplay. We have also increased the amount of time that it takes to recharge, replenish and refill the various gauges of the user in the "stress-free" mode. (For example, the number of hits obtained by a single attack is reduced, and the amount of time taken to recover from the effects of fatigue is also increased.) We have implemented such a system in order to make "gaming enjoyment" more fun. While implementing a new system, we have also focused

Features Key:

- More than 80 customizable characters, each with their own role
- 5 dungeons that you can freely explore as you choose your approach for battles
- A city to interact with NPCs
- Over 100 quests to complete in and out of the dungeons
- The world is divided into multiple themed countries, allowing players to enjoy the game in various ways
- A new combat system with a priority-based skill allocation system

Key game features:

- Character customization with thousands of items and more than 300 pieces of equipment
- Over 100 battles, including wild areas and special dungeons
- New and improved system to allow shared elements and consciousness between characters in the team
- Realistic on-screen battle effects and high resolution graphics

Key Development Environment Features:

- Source code that can be played in your browser
- Support for the scenario data formats used in the game
- Canvas platform to allow for players to have shared elements at all times

The development environment's foundation, the PIXEL* engine, is the internal engine that does not require installation of any additional program, and can adapt the player's browser platform. PIXEL4* uses a new combat system that is more flexible and includes a priority-based skill distribution system, in addition to making use of the new algorithm system in which the characters perform attacks in pre-determined sequences. The combat system has internal connection between the players, and opens up the world in a new way. Under the implementation of this system, players' levels and attributes are effectively connected, and players' movements in terms of skill allocation and level changes are tied together. Even after each character has the experience necessary to utilize a particular method, in terms of distributing the allocated skills, each player will experience different things depending on the skills they have chosen to grow. Furthermore, unlike the account system in the FINAL FANTASY series where your character's level affects your stats, in the PIXEL4* engine, your stats directly

key aspect of the game is the role-play system, wherein the main characters completely aware of each other and share their emotions. When you equip an , you are not simply enhancing your character's appearance or ability, but you actually taking over the role of a particular character. For example, by gning the "sword" role to the character whose role is "self-centered and

ressive", your character will become self-centered and aggressive. Similarly, assigning the "sword" role to the character whose role is "carefree and cooperative", your character will become carefree and cooperative.
