Hidden Shapes Old West - Jigsaw Puzzle Game - New Instructions! The time is 1570 and Old West. Guns and attacks! Grow town and plunder! And do not forget your eyes on board! Remember that wolves are hungry and try to catch them all. This game consists of nine rooms. The last room is the hardest. The last room

has a wolf with more than 200 pieces. The room is created to hide as a pearl with an unusual shape. It is difficult to catch a wolf by all the small opening if you have a jigsaw puzzle in your hand. If you want to get the highest score, you are recommended to solve the puzzle while the wolf is biting the board. Try hard and be on guard because your goal is to not get lost in some dark room. And what about you: Are you

ready? Two modes of gameplay: Time-attack Accuracy-attack The big wolf: Have you ever seen or heard a wolf? Do you think that there are no more? You are wrong. They are hiding in the dark corners of the forest. Before you know it, a big wolf will bite your ears with his sharp teeth and you will be in a real danger. But if you are fast enough, you will succeed. Two main objectives in this Old West

game: • To fill the board completely. • To catch as many wolves as you can before they bite your ears. The wolf is under your control. Now you see him. Now he is seen by you. Now the game begins. Good luck and fast fingers. Board Game The secret of this board game is simple. There are about two hundred pieces on the board. The piece number one will be somewhere on the board and everybody will

need to catch it. If you catch the first piece, you will earn one point. All pieces are different but the same, that is why the board is called "reversed shape". You can try to check the board to find the piece number one. But if you succeed, you will earn some bonus. Puzzle Game Wolves There are nine rooms in this puzzle game. But if you are afraid of wolves, try to escape as soon as you see a wolf in this Old West game.

Wolves are hungry and you are running from them. They bite your ears and if you lose there is no escape. Will
