The histone fraction of equine embryo-derived and mature red cells has been isolated. The techniques developed included preparative equilibrium density-gradient centrifugation, hypotonic treatment and differential sedimentation velocity. The isolated histones have been characterised by polyacrylamide gel electrophoresis and co-electrophoresis with P1-P4 histones. The histones have been freeze-dried, reconstituted and assayed Q: How to send data from one Drupal site to another Drupal site, based on a condition? How to send data from one Drupal site to another Drupal site, based on a condition? I have seen this question and this as well. But they discuss sending data from one Drupal site to another, with multiple tables and entities. I want to send data from a Drupal site to another Drupal site, based on a condition. I have two Drupal sites in production: Site A and Site B. Site A and Site B have the same core. In Site A there is an entity_table with the id's i need to get, e.g. id: 1 In Site B I have 595f342e71
