You can use these marks to suggest properties, changes, or fill your drawings with comments. 2D Vector Graphics (DVG): Easily share and organize your files, sketches, and designs with the New File Package. Easily open 2D Vector Graphics (DVG) files within AutoCAD without a viewer, and export into formats like Illustrator, Inkscape, and Indesign. 2D Data Management (DDM): Add, edit, view, and share 2D, 3D, and color data such as DWG, DXF, JPG, PNG, TIF, PDF, and PDB. Export 2D, 3D, and color data to common file formats like DWG, DXF, JPG, PNG, TIF, PDF, and PDB. Enhance drawing accuracy and consistency by defining, naming, and applying colors. 2D Bounding Box (2DBB): Bounding box lets you quickly identify the 3D space in which you are working by drawing one of the 3D box shapes that define a space. 3D Boundary Volume (3DBV): 3D Boundary Volume gives you tools to rapidly create and modify 3D objects with support for the boundary of the model. Object Variables (OBJ): Make changes to object properties without having to modify your drawing. Create and edit variables that can be applied to other objects in the drawing. 3D Data Management (3DDM): Add, edit, view, and share 3D data including points, lines, areas, polylines, and surfaces.
