In 2018, over 15.6 million people were using AutoCAD, which generated over $4.1 billion in revenue. Learn more about the history of AutoCAD from its beginning in the late 1970s and 1980s. AutoCAD History: 1982-2019 In late 1982, the developers of AutoCAD created their first computer version on the desktop of the Apple IIe. They worked with National Geographic Society and their Cartography Center to develop a software application that would be used to create maps of the world. The original name for the software was AutoCAD, but they changed the name to AutoCAD when their business model shifted and it became clear that they were developing more than a product for cartography. AutoCAD came in two versions: AutoCAD LT (or simply AutoCAD) and AutoCAD Pro. The original AutoCAD LT would only work on Apple IIe systems, but in 1984, a version was created that could also run on the CGA or VGA video cards of Atari 8-bit and 16-bit computers, and was renamed AutoCAD Pro. AutoCAD's development team grew and changed over the years. In 1982, they were four people: Kenneth Bowler, John Ellson, Eric Haines, and Ian Roberts. In 1990, they were 40 people, and today they are more than 1000 employees. In 1994, the first official version of AutoCAD that was sold by Autodesk (then AutoCAD Engineering Services) was AutoCAD version 7, and was known as "AutoCAD 7.0". In 2006, it was version 12. Learn more about the history of AutoCAD from the 1980s and 1990s. Autodesk was founded in 1982 by John Walker, Chuck Peddie, and David Ungar. Their idea was to create a computer-aided software development tool for CAD applications. They released the first AutoCAD software in the middle of 1983. The first version was called AutoCAD LT (for low-cost, or less expensive, AutoCAD) and was released for the Apple II and CGA video card in 1984. By the time they created AutoCAD in 1985, they had decided to expand their software development to include other graphics software as well as CAD and drafting. To better name the company they rebranded it as "Autodesk" (from "autom
