Volkswagen has issued a recall for nearly 1.7 million U.S. models due to a faulty sensor on the transmission that could cause the engine to stall. The company issued a notice in early April, and says the issue only affects “select 2015 to 2017 vehicle models that use the 2.0-liter turbocharged four-cylinder diesel engine.” The federal recall was issued to correct a “potential for inaccurate transmission shift position.” The vehicle is required to be brought in to a dealer where the defective sensor is replaced by an alternative that could reduce the risk of engine stalling. Each affected vehicle is required to have a printed recall notice from the manufacturer. - (Submitted by: David Whelan) \*Expected Arrival Date: Not Available\* Customers in Quebec will finally be able to trade in their old car for a new one thanks to an agreement between Quebec’s Minister of Finance and transportation Jean-Yves Duclos and CAA Québec. The two will sign a deal to provide drivers with the option to upgrade to a new vehicle without paying a premium. The goal will be to allow drivers to spend 50% of their income on their car

---

instead of putting it down on an interest-only loan. In order to qualify, customers must be able to pay for a vehicle within a set period.

Duclos expects to complete the deal with CAA Québec by the end of the year. -
