Although not originally envisioned by Westwood Studios, Red Alert 2 was created following the success of the original Red Alert. Set in the early 1970s, Red Alert 2 picks up at the conclusion of the Allied campaign of the first game, making the original idea of Red Alert being a prequel to Tiberian Dawn difficult to realize and separating the Red Alert universe as its own series. In October 2001, the expansion pack Yuri's Revenge was released.

## Command And Conquer: Red Alert 2 (Portable)

in 2016, ea's frank gibeau spoke to digital trends about the status of the red alert franchise and whether it has plans to release a new title. gibeau declined to specify whether the games made by westwood studios could be considered canon, since they predate the current franchise, but revealed they have continued development on them. he also said that the franchise "had a good run," and expressed doubt that it will be revived. this suggestion was challenged by the fanbase in early 2018. although there is a possibility that the franchise could be revived with new developers, mark rein, one of the lead developers on the game, said in 2017 that he sees no reason to do so and would be disappointed if one was created. [26] besides the games, electronic arts also released a spin-off game for the series, c&c generals: zero hour. the game is a turn-based tactical war game based on the second and third entries in the series. generals: zero hour was released on the game.com, game boy color, and the playstation portable. [27] in 2009, electronic arts took full control of the command and conquer franchise and has since released a line of original games focusing on a new setting, storyline, and gameplay mechanics. these games, collectively known as the kane's wrath series, were developed by big huge games and published by ea. [28] in addition to these games, kane's wrath has seen other titles set in various in-game universes, some released by westwood (such as a 1-4 player strategy game set in the command & conquer universe), and others by electronic arts. these games were published by a variety of developers, including ea, thq, crystal dynamics, pandemic studios, and access games. the command & conquer: kane's wrath series was terminated in 2017 when electronic arts shut down the internal studio big huge games.
