gta vice city bangla copy original and paste it in the url page then it will be playable in this game I've been playing this game for about 4 or 5 days now and i was wondering why do i have to have my savegame in the local c:/games/motorcity/. I don't really want to change my computer or do anything on it. I'm just playing my savegame in this game. I would like to play the game in my computer and use my savegame, otherwise i'm just using my savegame in my local data. Last edited by Hajan; Jun 13 2014 at 10:07 dd2bc28256
