Imgsrc Ru Password List

You really should consider not having them on your FTP server. There would be no way to protect the password. You should have a PHP page... that allows you to delete the file. If you can't figure out how to do this, try to find software that does it for you. If the file exists, you won't be able to delete it. Do not open files without a password and they will be kept until needed or they are deleted. 4. Don't use FTP to transfer files. This means that you should not submit files as plain text files. dd2bc28256
