
Realflight G4 Dongle Emulator V3 2.rar

Improve your flight performance with an advanced flight model, plus added features like dynamic drift compensation, an incredibly accurate external thermometer for precise AFR and EGT, and 1,000°C rated MCU connectors for your powered accessories. Rocking takeoff performance with the RealFlight P3 - Based on the World Champion RTF P3 RealFlight provides a realistic look at actual flight conditions and a huge community of people from all over the world. Whether you plan to race, fly, compete or just have fun, RealFlight is designed to provide an incredible experience. When you start, you will see 5 dongle. Test them out with Phoenix and then with a real model aircraft. Later you will find out, you need to connect the right dongle to the right radio. (RCFlight Wiki) There are some things that may not work on your computer... if that is the case it is probably better to use the Interlink Stick-on software available here at <http://emulator-g4.shelbypp.co.za> , rather than the one I have packaged up. It is much older and newer, but much improved over what I originally built. There are also just a couple of features that are missing... if that is the case it is probably better to use the Interlink Stick-on software available here at <http://emulator-g4.shelbypp.co.za> , rather than the one I have packaged up. It is much older and newer, but much improved over what I originally built. RealFlight 9.5S adds more features to the #1 RC flight simulator in the world, including new aircraft, AMA Flying Site 4, and the benefits of being delivered exclusively via Steam - the world's largest digital distribution platform for PC games and sims!
