
RealiTone Realivox The Ladies KONTAKT [PAZ] 30 !!TOP!!

RealiTone also offers two more sampled instruments, The Bessesafe and The DrumMash, both of which are straight-up synth basses. The DrumMash on the other hand is an extremely capable sampler in its own right but, as a whole, this pack is mainly geared towards playing backing vocals - whether sampled or dry. The Bessesafe is a true virtual synth bass and the instruments sampling is so good (and seems to respond to all typical bass amp and speaker settings) that it makes for a much more accurate representation of a bass amp than even the go-to bass amp virtual instrument out there. The bassline didn't exactly sound exactly as a sampled bass should, but its accuracy and flexibility was excellent, and really suited the song. We never encountered any real issues on the MacPro and were able to tweak easily with the help of the free Logic 9 and MasterKeys Kontakt Player. I was able to spin tracks through the mixing process without too much of a fuss. Anybody who has read my other reviews will have noticed that I like to present the producers own custom presets to enable them to further analyse their gear and produce the finest sound possible. While my presets are detailed and complex, if you get into the habit of using them, you'll soon be turning out fantastic sounding presets for yourself. So here is Realitones demo for Realivox Ladies and it features Samples Preset 01 customised by Tim Leathers. Each tracks individual manual controls. Each knob or slider has been customised for the intended purpose so not to use any of the knobs or sliders, which gives a different view of the gear and how it works. You can see the mixer in the bottom right of the photo above. Again, check out the rest of the Realivox Ladies documentation and features on our site. I look forward to hearing a sample of your customised settings.

RealiTone Realivox The Ladies KONTAKT [PAZ] 30

Realitone Realivox samples are packaged in a way that makes it easy to take a sample and edit it as you like using your favorite audio editor. I used Wavedit for this. You can easily compress it down to half size or make it bigger if you wish. You can quickly make sure it will match a certain tempo. These vocals are pretty great so it really is a no brainer. You can change the vocal intensity, make it brighter, darker, duller. You can add reverb or delay, compress or stretch them up or down. I also gave it a quick cut. I then sent it through reverb again to soften it and make it less harsh. It is a lot of fun! New York - New York (30 Juin 2020) 2E-LI-JAH-3D-L. 30 Juin 2020...
