
Morph Mod Minecraft 1.10.2 [UPDATED]

for the context of this mod, portal guns are among the single most hated parts of mojang's most recent update. the mod causes weird lighting effects and doesn't work entirely as intended. it looks really bad at night, too. so it was important for me to sort out that issue as soon as possible. so i'll start with the technical stuff. aside from the issues with transparency, the mod doesnt mesh with minecraft 1.10.2 at all. the implementation of light in this mod was also very sloppy. it used an implementation of the type 2 shader, but didn't manage to write to the lightmap properly. so when you look at the skybox in this mod, it's probably just a cube. rendering individual lightmaps is fairly taxing to the gpu (as well as cpu in the case of the skybox) and i didn't want to negatively impact gameplay for anyone. additionally, i didn't want to spend time on the problem, so that i could continue working on other aspects of the mod. so that's why i use shaders and decimated. the rendering system was never designed to deal with this and putting down the decimated meshes is very simple compared to setting up a shader. so for now, this mod was complete abandoned. however, after the release of minecraft 1.10.2, it was decided to make the shader incompatible and the mod was... abandoned. with the release of minecraft 1.10.2, i went back to the mod and upgraded most of the mod to work in that version. the only changes i had to make were to not use decimated textures, and to include the proper materials in the mod so that meshes look correctly. i also tweaked the lightmaps to give the skybox the correct lighting.
