Dear Reality DearVR Music 1.2.2 ((FREE))

[Download](#)

dearvr music is free and open source, with its own powerful and easy-to-use interface and an intuitive xyz pad for positioning the track in a three-dimensional virtual scene. the simple but powerful tagging system makes it easy to move and adjust the sound to any environment. the program also features a flexible plug-in architecture which allows for easy integration of other solutions, such as professional mastering plug-ins. dearvr music is a new approach to mixing. at its core, dearvr music is a simple virtual 3d mixer that breaks the shackles of stereo and flat sound. with one mouse click you can

move the track to any position in a 3d space or adjust the sound to any position in the space using sliders. use the intuitive interface to position a track almost behind or in front of the listener, above or below his head, left or right, closer or farther away, and create a unique listening experience. and, for all kinds of mixing, such as mastering, post-production and video. say goodbye to expensive middleware, unwieldy software bundles and complex routing schemes. all the tools you need to create stunning, immersive 3d and surround audio for virtual reality (vr) and augmented reality (ar) videos, immersive music, videos, film post-production and games are included in dearvrs powerful yet fast and intuitive interface. simply drag your mouse around using the plugins graphical xyz pad to position a tracks sound anywhere in a 3d soundstage behind or in front of the listener, above or below their head, to the left or right, closer or farther away. or use separate sliders for adjusting the sounds elevation,

azimuth and distance from the listener.

dearvr pro outputs the highest-quality 3d audio in seven delivery formats (including audio for 360-degree videos on youtube and facebook), meeting all the professional requirements for any vr or ar production. select 2-channel binaural format for totally immersive playback using conventional headphones. or choose 4-channel first order, 9-channel second order or 16-channel third order ambisonics output in either ambix or furse malham (fuma) format. the plugins 46 stellar virtual acoustic environments can also be used like conventional reverbs in 2d stereo mixes, doubling their usefulness for music production. the latest feature update extends the state-of-the-art binaural and ambisonics encoder with 26 different multi-channel loudspeaker output formats from 5.0, 5.1.4, 7.4, up to 13. the brand-new dearvr vhsp technology combines the ultra-realistic room and distance simulation with

the groundbreaking virtual height speaker perception for 5.1 and 7.1 setups. its easy to handle two modes of operation allow you to choose how to work. dearvr music is free of charge and completely open source. it features a user-friendly interface, a system tray icon, and it's easy to deploy and use. its multichannel output support is limited only by your speakers and the channel count of your daw. so get to it! turn your daw into a virtual reality powerhouse in no time. dearvr pro is a plug-in for the common daw and multichannel audio editor. it features 20+ presets, 45+ virtual acoustic environments, 6 reverb presets and 15+ image types. it features an easy to use visual interface that allows you to drag the position of the different objects in the 3d space. its multichannel support is limited only by your speakers and the number of channels in your daw. 5ec8ef588b
