I have been a Mac user for many years, drawn a long bow and shoulder a bag over to iPad Pro and Back to Mac after major upgrade to CC. After the jump, I give this app a five star rating, and one of the best and most useful apps I have ever used on an iPad. Loved the UI, took no time to get up to speed and feeling real wasy. No glitches, one of my cions are "How simple is the UI to use", I tried to use PS on Mac for 4 years, on my iPhone, my Mac and still felt a learning curve so I take these comments back about " simple" to "CS3 on Mac". A big thumbs up for Adobe.
Yes, I like Apple, but Photoshop on Mac was like hardware now software (Mac Pro) and it wasn't really worth the cost. iPad Pro and Photoshop Elements are the way forward for my work and workflow on my Mac.
