What's New in the TMS What 039;s New?

===== TMS What's New plugin is a plugin that was designed for developers or software programmers who are interested in TMS Software products keep in touch with their software solutions by implementing a bunch of functions directly in their Delphi IDE (Integrated Development Environment). This plugin can help you keep in touch with new TMS Software releases, product updates, release notes, history data, component descriptions, blog articles and even tweets, you just have to navigate to the appropriate tabs according to your needs. TMS What's New lets you keep in touch with the latest articles on the TMS blog by displaying them in your feed as soon as they get posted. Same goes with the TMS tweets, which are instantly displayed within the plugin's dedicated section. You can benefit from receiving detailed information for products that you're interested in along with the latest updates, so that you don't get left behind. It integrates well into the Delphi and C++Builder integrated development environments as docking panels into both IDEs, making it convenient to access and use.
